LASER

Multi-Function

Biz-Quality 4-in-1 Multi-Function

Multi-Function

"4-in-1" multi-Function design dramatically improves business efficiency for every document-related task from faxing and copying to scanning and printing.

With Panasonic's new KX-FLB811, you can fax, scan, copy or print with high-speed, high-performance laser quality. Stylish and compact, the KX-FLB811 not only takes up less space than standalone units, it comes standard with a 2-bin document separator that lets you sort output two different ways for added convenience.

Laser Printer

Quality Laser Printing

The laser printer function helps assure high quality reproduction at 600 x 600 dpi resolution in every document and drawing you want to print or copy.

USB 2.0 PC Interface

The KX-FLB811 comes standard with a USB 2.0 interface for easy connection to a PC. The bundled "Multi-Function Station" launcher software allows easy setup and selection of multiple functions.

High-Speed 18-ppm Laser Printing

The KX-FLB811 boasts high-speed printing and copying at speeds of up to 18 pages per minute with quick warmup time of 15 seconds.

250-Sheet Paper Tray

Since the standard paper tray can hold up to 250 sheets, you don't have to worry about running out of paper even during a high-volume print or fax job. For added flexibility, a Multi-Purpose Tray allows you to manually feed paper of various types and sizes (Label/Envelope/Coated Paper/Thick Paper/Transparency).

Flatbed Copier

Flatbed Design

In addition to the 40-sheet Automatic Document Feeder, a built-in flatbed allows you to scan, copy, or fax a variety of originals in different shapes or sizes such as magazines, newspapers, business cards, etc.

High-Quality Image Reproduction

A built-in CCD (charge-coupled device) image sensor makes high-speed scanning and high-resolution image reproduction possible even when the spine is raised slightly above the glass plate.

High-Resolution Digital Copier

With resolution of up to 600 x 600 dpi, sharp, clear copies are assured. Multiple copies of up to 99 sheets are possible.

18-cpm Copy Speed

The KX-FLB811 delivers high speed copying of up to 18 copies per minute with quick warmup time.

Colour Scanner

Colour Scanning with Flatbed and ADF

The KX-FLB811 allows you to scan documents in colour or black-and-white at a high resolution of 600 x 1200 dpi (with flatbed), or 600 x 600 dpi with a 40-sheet Automatic Document Feeder. (Max. scanning resolution of 9600 x 9600 dpi is available when interpolation is used.)

High-Quality Scanning

The KX-FLB811 outputs scanning images with 24-bit colour gradations (48-bit input), or 8-bit black & white gray scales (16-bit input).

Image Processing Software

When the Multi-Function Station launcher software is installed on your PC, you can easily access a variety of image processing functions from the graphical menu. With the "Viewer (Scan)" menu, you can choose Page View, Reduction, Rotate, Duplicate, and Cut and Paste functions. OCR (Optical Character Reader) function is also available in 1-byte language designation models.

Laser Fax

33.6 kbps High-Speed Fax Modem

The Panasonic laser fax is designed for fast, efficient fax transmission at speeds up to 33.6 kbps (4 seconds per page^{*1,*5}).

Dual Access Operation

Even while the KX-FLB811 is busy sending or receiving a memory-based fax, you can store additional documents to send later.

Document Memory

This unit can store up to 170^{*2} pages in its built-in memory. Ideal for broadcasting multi-page documents to multiple locations, this feature also enables out-of-paper reception of up to 150^{*2} pages.

64-Level Halftone with Digital Image Processing

You can send or copy everything from family photos to company documents with near-original quality, thanks to the clarity and detail of 64-level halftone reproduction.

2-Bin Separator

Unique 2-bin document separator allows versatile use. You can use the two trays for two different uses; for example, you could use one exclusively for receiving faxes and the other for copy output. And when connected to a PC, printer output can be specified for either the upper or lower tray from the printer driver screen.
